## EXPERIENCE

### **Liberty Mutual Insurance, Chicago, IL — *Data Platform Engineer***

March 2022 - PRESENT

- Maintain data platform CI/CD orchestration tools such as Control-M and Snaplogic by regularly updating or adding enhancements.
- Assist Data Engineers in getting custom logic built in to ensure desired orchestration patterns work as intended.
- Monitor platform observability by building out DataDog logging service and creating dashboards.

**Technologies used:** AWS, Bash, Python, Java, Ansible, Docker, Snowflake, DataDog

### **Braintree, Chicago, IL — *Software Engineer***

June 2020 - March 2022

- Contribute to Spring Boot Pricing application that creates scheduled jobs to retrieve data from banking partners, use data to aggregate into fees, and then send fee information to Braintree's disbursement and reporting platforms.

**Technologies used:** Kotlin(JVM), Java, Spring Boot, Kubernetes, Docker, Postgres, AWS, Apache Spark, Apache Airflow, Jenkins.

### **Braintree, Chicago, IL — *Technical/API Support***

December 2016 - June 2020

- Created example Braintree integrations and internal support apps, including QA tool to compile and email monthly reviews.
- Munge and manipulate data for raw credit card imports/exports by creating custom scripts and utilizing command line tools to create desired data format.
